Benchmarks Regulation and IBOR transition	<p>ESMA recognised EURIBOR as BMR compliant: 5 Jul 2019</p> <p>ECB working group on Euro risk-free rates issued final recommendations: 16 Jul 2019</p> <p>Amendments to IFRS 9 on IBOR/ benchmarks reforms apply: 01 Jan 2020</p> <p>FCA risk-free-reference rate working group clarifies £LIBOR interim timeline: 29 April 2020</p> <p>EC proposal to revise the EU Benchmarks Regulation tabled: 24 July 2020</p> <p>European Parliament and Council negotiations on EC proposal: September 2020</p> <p>Earliest possible finalisation of new legislation: end Q4 2020</p> <p>ECB consultation on €STR compounded rate: 24 July – 11 September</p> <p>End of BMR transitional period for critical & third-country BMs: Dec 2021</p>	<p>On 29 April, the FCA RFRWG recommended that:</p> <ul style="list-style-type: none"> • By end of September 2020, lenders should be able to offer non-LIBOR linked products to customers, • Post September 2020, lenders should include contractual arrangements in all new or re-financed products that still reference Libor that enable a fallback to one of the risk-free alternative reference rates before the end of 2021. • By Q1 2021, all new loan product should no longer reference Sterling LIBOR. <p>The EC legislative proposal tabled in July 2020 would create the conditions for a statutory fallback rate for all Libor referencing contracts to be designated in all currencies by the EC and outlines amendments that would enable corporates to continue referencing non-EU non-convertible FX spot rates for hedging purposes after the end of 2021. The EC would designate the relevant foreign exchange benchmarks that would be carved out of the scope of the BMR. To qualify for the exemption the non-EU rate would need to refer to a spot exchange rate of a non-freely convertible rate, a rate that is used by supervised entities in the EU on a frequent and systematic basis in derivative contracts for hedging purposes, and the FX benchmark is used as a settlement rate to calculate pay-outs in derivative contracts.</p> <p>For Libor transition, with the new rules the EC could designate a statutory fallback rate for Libor – in the various relevant currencies – by reference to the rate recommendations of the pertinent risk-free-rate-working groups in the relevant jurisdictions. The statutory replacement would only be for contracts of supervised financial entities, but national competent authorities are urged to provide statutory replacement rates that mirror this for use by non-financials – as the scope of the BMR only captures financial entities as supervised entities, the statutory replacement rate in the BMR would only be relevant for contracts involving at least on financial counterparty. For any contracts that corporates have either intercompany or with other corporates, the EC urges national competent authorities in all member states to provide the same statutory replacement rate chosen by the EC.</p> <p>Member State representatives in Council will discuss their amendments to the EC proposal (possibly only in a single session) on 4 September. The rotating Council Presidency (currently held by Germany) has proposed amendments that would extend the scope of the statutory fallback to all types of contracts and cover all entities, even those that are not supervised entities within the scope of the BMR. This would mean that the statutory fallback would not only apply to financial-corporate contracts, but also to corporate-to-corporate contracts. There also proposed amendments to clarify the interaction with other types of contractual fallbacks such as the ISDA fallbacks.</p> <p>The Economic and Monetary Affairs Committee in the European Parliament will likely start its deliberations on the EC proposal throughout September.</p>
CRA Regulation IV	<p>ESMA Guidelines on supervisory reporting for CRAs: 5 Feb 2019</p> <p>EC draft implementing equivalence decisions for non-EU countries under CRA: 11 Jun 2019</p> <p>ESMA technical advice on sustainability considerations for CRA & final guidelines on disclosure requirements: 18 Jul 2019</p>	<p>ESMA has recommended stronger fining powers and stronger say in fee structure of CRAs. There is a planned review of the rotation mechanism. Moreover, as part of a broader competition agenda aimed at breaking up the current monopoly of the big three CRAs coupled with the current sustainable finance agenda, there will be discussions around breaking this monopoly and encouraging more open competition.</p> <p>On 18 July 2019 ESMA issued technical advice on sustainability considerations for CRA and final guidelines on disclosure requirements applicable to credit ratings following the call from the EC. ESMA advises against amending the CRA Regulation to mandate the consideration of ESG factors in rating assessments for the time being.</p>
MiFID3	Broader review of MiFID 2/R: 2021	Current expectations are for a broad-based review of all aspects of the MiFID 2 framework, including the potential introduction of new transparency requirements for asset classes that are not covered so far – e.g. FX spot markets – and the potential expansion of trading mandates to cash products such as bonds. Another area of focus will lie broadly on equity and non-equity market structure and the extent to which the MiFID 2 framework has been effective. The introduction of a real-time consolidated tape (pre- and post-trade) for

MiFID quick-fix proposal	<p>EC proposal for a Covid-19 related MiFID 2 quick fix: 24 July 2020</p> <p>European Parliament and Council negotiations on EC proposal: September 2020</p> <p>Earliest possible finalisation of new legislation: end Q4 2020</p>	<p>The European Commission has tabled a quick-fix proposal with changes to MiFID. The proposal lowers the burden of some investor protection rules including through more flexibility in costs and charges disclosure and publication of best execution. The proposal includes amendments to the rules on investment research and the unbundling of charges for SME investment research to facilitate greater access to this type of investment research.</p> <p>For Corporates there are important changes to commodity hedging exemption (and position limits) for corporates as well as an alleviation on product governance requirements for plain vanilla corporate bonds to facilitate greater retail investor participation in corporate bond markets.</p> <p>As such, the EC proposes the introduction of:</p> <ul style="list-style-type: none"> • A hedging exemption from the commodity position regime for non-financial groups where the group includes an investment firm that holds commodity positions that measurably reduce the risks related to the non-financial activity of the group. • A position limits exemption for non-financial and financial counterparties that are under a mandatory liquidity provision obligation. • Exemption for securitised derivatives from the commodity position limits regime. • Reduction of the scope of the commodity position limits regime to agricultural commodity derivatives and derivatives contracts that are considered significant benchmark contracts (open interest of more than 300 000 lots over one year). ESMA will define the captured contracts further in a regulator technical standard). • Simplification of the ancillary activity exemption from the requirement to become an investment firm that market participants can apply for when trading in commodity markets and their trading activity is ancillary to their main business. The proposal removes the quantitative thresholds and maintains only a qualitative threshold. The qualitative threshold sets out that one is eligible for the exemption when one deals on own account or provides investment services to customers or supplies of the main business. • Exemption of corporate bonds from product governance requirements (e.g. the “make whole provisions”) that protect investors from losses in case issuers repay bonds early. This would allow plain vanilla corporate bonds to be marketed to a wider pool of investors without complex product governance rules.
Prospectus Regulation quick-fix & Review of Regulation	<p>EC proposal on revisions to the Prospectus Regulation: 24 July 2020</p> <p>EC proposal to overhaul entire Prospectus Regulation: Q4 2021</p>	<p>The main amendments that are proposed to the Prospectus Regulation are a lower prospectus burden for already listed companies (for a period of 18 months) when tapping markets for further funding. The proposal therefore suggests the creation of a new short form prospectus – “the EU recovery prospectus” – to enable companies to access public markets more efficiently. The simplified prospectus would only be available for share issuance and not for debt issuance.</p>

NFCs will only have to clear in the asset classes for which the clearing threshold is breached and not in all asset classes once one threshold is breached. <p>ESMA’s draft technical standards on procedures for trade repositories set out the process for moving the external reporting obligation to financial counterparties.</p> <p>ESMA updated Q&As on EMIR, including on the reporting of FCs on behalf of NFC- as of 18 June 2020.</p>
SFTR implementation	<p>ESMA no action relief for SFTR reporting: 26 March 2020</p> <p>Phase-in of the reporting obligations by category of counterparties - from 13 Jul 2020</p>	<p>The Securities Financing Transactions Regulation (SFTR) introduced a reporting regime for securities lending, margin lending, buy-back, and repo transactions. Specifically, the Regulation creates:</p> <ul style="list-style-type: none"> ▪ Mandatory reporting of sec lending/ repo/ security financing transactions to a registered trade repository <p>In March 2020 against the backdrop of the Covid-19 pandemic, ESMA issued no-action relief, revising the effective dates for the reporting obligation as follows:</p> <ul style="list-style-type: none"> • 13 Jul 2020 – for credit institutions, investment firms, CCPs, CSDs and relevant third-country entities to start reporting; • 12 Oct 2020 – for insurance companies, funds, institutions for occupational retirement provision (IORPs), and relevant third country entities to start reporting; • 11 Jan 2021 – for non-financial counterparties.
CMU 2.0	<p>Final report EC CMU expert group: 10 June 2020</p> <p>New EC action plan on CMU: Q3 2020</p>	<p>The EC launched its own High-Level Forum which presented its final report in June 2020. On the basis of this report, the EC will issue an Action Plan in Q3 2020 outlining the next phase of the CMU.</p> <p>The EC’s High-Level Forum on the CMU published its final report, with specific recommendations focused on how best to grow capital markets by addressing key issues, such as facilitating access to finance for businesses and increasing retail participation. The report focused on improving the EU securitisation framework promoting long-term investments, expanding open finance, ease investors’ access to companies’ data, increase private pension coverage and leverage sustainability and digital transitions.</p>

The EC is asking ESMA to go beyond the areas for review laid out in Level 1 in an effort to finetune certain provisions of the MAR framework – notably asking ESMA to look at the inclusion of FX spot markets into the scope.</p> <p>On 3 October 2019, ESMA launched a broad consultation on its MAR review report. Its final report on the review of MAR is expected to be submitted to the EC in Spring 2020.</p>
Corporate governance: non-financial reporting (NFRD)	<p>Trilogue agreement on taxonomy regulation scopes in corporates as per the NFRD definition and imposes mandatory disclosure of share of taxonomy compliant activities: December 2019</p> <p>EC to table proposal on the review of NFRD: Q1 2021</p>	<p>The EC is considering expanding the scope of the Directive, as well as the scope and granularity of the information that should be reported. It is also aiming to reinforce the double materiality perspective of the non-financial reporting requirements that obliges companies to report both on the impact of ESG matters on their financial performance, as well as their impact on society and the environment. Additionally, the Commission is looking into the possibility of requiring external assurance of non-financial information, as well as the use of a single set of reporting standards and a digital format.</p>

EC will propose legislation in 2020 to turn this reporting requirement into a binding capital requirement. Leverage ratio (LR): Set as a 3% binding ratio for all banks. The EU also applied the Basel III G-SIIs LR buffer, which can increase the LR for G-SIBs to up to 4.25%. Net Stable Funding Ratio (NSFR): Introduces small changes to the Basel standard – simplifying the NSFR for smaller institutions for reporting – and, regarding the treatment of SFTs, lowering the stable funding factors. Resolution: Reviews the EU resolution framework, with provisions amending the Banking Recovery and Resolution Directive (BRRD) and the Single Resolution Mechanism Regulation (SRMR) - BRRD2, SRM2. In the final text the moratorium powers are streamlined allowing resolution authorities to suspend all payment and delivery obligations, unless exempted, when an institution is failing or likely to fail – limited to the maximum of 2 days.
2020 Covid-19 related revisions of bank capital rules	<p>Legislative proposal by the European Commission: 28 April 2020</p> <p>OJEU publication of quick-fix: 26 June 2020</p> <p>Entry into force of changes: 27 June</p>	<p>On 28 April 2020, the European Commission released a proposal to provide banks with temporary capital relief, in light of the covid-19 pandemic. The proposal will be examined by the Council and the European Parliament, and an agreement could be reached around end of May. The measures proposed include:</p> <ul style="list-style-type: none"> Extending the IFRS 9 transition regime and to postpone by seven years the provisioning requirements for publicly guaranteed non-performing loans (NPLs), to allow banks to free up capital. Amending the leverage ratio's offsetting mechanism which has been found to have undesired consequences on banks' leverage ratio calculations in the context of banks' increased exposures to central banks. Postponing the application of the leverage ratio buffer requirement to 1 January 2023 and to bring forward the application dates of certain capital relief elements included in the 2019 review of the CRR, notably the so called infrastructure and SME supporting factors which allow for a more favourable prudential treatment of exposure to these assets. <p>The EC underlined however that banks would need to play their part in the recovery in response to these temporary capital relief measures and should signal their commitment by moderating variable remuneration and refraining from distributing dividends or buying back shares.</p>

Key points would include:</p> <ul style="list-style-type: none"> CVA calculation & exemption: move to a revised standardised approach on CVA charge, including question of maintaining the existing CVA exemption for corporates. Changes to credit risk calculations: to standardised approach and internal model approach for credit risk. Changes to treatment of specialised lending and unrated corporates: to how bank exposures to unrated corporates and loans to corporates for project and infrastructure finance or leasing will need to be capitalised by banks Changes to capital calibrations for certain exposures such as revolving credit facilities and unconditionally cancellable credit lines FRTB: EC is set to propose to turn the reporting requirement into a binding capital requirement. Changes to operational risk framework: to introduce a new standard on calculating RWA capital requirements. Introduction of an output floor – to reduce the variability between RWA calculations based on standardised vs internal models <p>On 27 March 2020, the BCBS declared it will delay all Basel IV implementation timelines by one year as a consequence of the COVID-19 pandemic. This means that all jurisdictions will have to implement the package by January 2023 (instead of January 2022), and the output floor transition regime is extended from January 2027 to January 2028. Welcoming the BCBS' extensions, the Commission also confirmed it will delay the publication of the CRR/CRD review implementing Basel IV beyond June 2020. However, it did not specify a new deadline for implementation yet.</p>
