<b>Benchmarks Regulation and IBOR transition</b>	<p>ESMA recognised EURIBOR as BMR compliant: <b>5 Jul 2019</b></p> <p>ECB working group on Euro risk-free rates issued final recommendations: <b>16 Jul 2019</b></p> <p>Amendments to IFRS 9 on IBOR/ benchmarks reforms apply: <b>01 Jan 2020</b></p> <p>FCA risk-free-reference rate working group clarifies £LIBOR interim timeline: <b>29 April 2020</b></p> <p>EC proposal to revise the EU Benchmarks Regulation tabled: <b>24 July 2020</b></p> <p><a href="#">Council finalizes position on BMR Review</a>: <b>7 October 2020</b></p> <p><a href="#">Negotiations in the EP on the BMR review ongoing</a>: <b>October 2020</b></p> <p><a href="#">FSB global roadmap on Libor transition</a>: <b>16 October 2020</b></p> <p><a href="#">ISDA Libor fallback protocol launched</a>: <b>23 October 2020</b></p> <p>End of BMR transitional period for critical &amp; third-country BMs: <b>Dec 2021 (could be extended to 31 December 2025)</b></p>	<p>On 29 April, the FCA RFRWG recommended that:</p> <ul style="list-style-type: none"> <li>By end of September 2020, lenders should be able to offer non-LIBOR linked products to customers,</li> <li>Post September 2020, lenders should include contractual arrangements in all new or re-financed products that still reference Libor that enable a fallback to one of the risk-free alternative reference rates before the end of 2021.</li> <li>By Q1 2021, all new loan product should no longer reference Sterling LIBOR.</li> </ul> <p>The EC legislative proposal tabled in July 2020 would create the conditions for a statutory fallback rate for all Libor referencing contracts to be designated in all currencies by the EC and outlines amendments that would enable corporates to continue referencing non-EU non-convertible FX spot rates for hedging purposes after the end of 2021. The EC would designate the relevant foreign exchange benchmarks that would be carved out of the scope of the BMR. To qualify for the exemption the non-EU rate would need to refer to a spot exchange rate of a non-freely convertible rate, a rate that is used by supervised entities in the EU on a frequent and systematic basis in derivative contracts for hedging purposes, and the FX benchmark is used as a settlement rate to calculate pay-outs in derivative contracts.</p> <p>For Libor transition, with the new rules the EC could designate a statutory fallback rate for Libor – in the various relevant currencies – by reference to the rate recommendations of the pertinent risk-free-rate-working groups in the relevant jurisdictions. The statutory replacement would only be for contracts of supervised financial entities, but national competent authorities are urged to provide statutory replacement rates that mirror this for use by non-financials – as the scope of the BMR only captures financial entities as supervised entities, the statutory replacement rate in the BMR would only be relevant for contracts involving at least on financial counterparty. For any contracts that corporates have either intercompany or with other corporates, the EC urges national competent authorities in all member states to provide the same statutory replacement rate chosen by the EC.</p> <p>Member State representatives in Council finalised their amendments to the EC proposal and have added more legal certainty by:</p> <ul style="list-style-type: none"> <li>Extending the availability of the statutory fallback to all types of contracts and all entities on a voluntary basis.</li> <li>Clarifies that contractual parties can choose not to apply the fallback.</li> <li>Clarifies the legal basis for the fallback as well as the trigger events that are necessary for the EC to designate fallback rates.</li> <li>Makes clear that the EC would only designate complete rate packages of risk-free-rate working groups as statutory fallbacks. They would need to include the replacement rate, the interest rate differential, as well as the conforming changes needed.</li> <li>Extends the transition period for use of non-BMR compliant third country benchmarks to 31 December 2025 to allow for more time for a full review of the BMR.</li> </ul> <p><b>The Economic and Monetary Affairs Committee in the European Parliament will likely finalise its deliberations by mid-November, paving the way for inter-institutional negotiations with Council to begin in the second half of November.</b></p>
<b>CRA Regulation IV</b>	<p>ESMA Guidelines on supervisory reporting for CRAs: <b>5 Feb 2019</b></p> <p>EC draft implementing equivalence decisions for non-EU countries under CRA: <b>11 Jun 2019</b></p> <p>ESMA technical advice on sustainability considerations for CRA &amp; final guidelines on disclosure requirements: <b>18 Jul 2019</b></p>	<p>ESMA has recommended stronger fining powers and stronger say in fee structure of CRAs. There is a planned review of the rotation mechanism. Moreover, as part of a broader competition agenda aimed at breaking up the current monopoly of the big three CRAs coupled with the current sustainable finance agenda, there will be discussions around breaking this monopoly and encouraging more open competition.</p> <p>On 18 July 2019 ESMA issued <a href="#">technical advice</a> on sustainability considerations for CRA and <a href="#">final guidelines</a> on disclosure requirements applicable to credit ratings following the call from the EC. ESMA advises against amending the CRA Regulation to mandate the consideration of ESG factors in rating assessments for the time being.</p>
<b>MiFID3</b>	<p>Broader review of MiFID 2/R: <b>Q4 2021</b></p>	<p>Current expectations are for a broad-based review of all aspects of the MiFID 2 framework, including the potential introduction of new transparency requirements for asset classes that are not covered so far – e.g. FX spot markets – and the potential expansion of trading mandates to cash products such as bonds. Another area of focus will lie broadly on equity and non-equity market structure and the extent to which the MiFID 2 framework has been effective. The introduction of a real-time consolidated tape (pre- and post-trade) for all asset classes both equity and non-equity is also being considered as one way of achieving broader capital markets integration.</p>

<b>MiFID quick-fix proposal</b>	<p>EC proposal for a Covid-19 related MiFID 2 quick fix: <b>24 July 2020</b></p> <p><a href="#">Council adopts position on MiFID Review: 21 October 2020</a></p> <p>European Parliament adopts position on MiFID review: <b>27 October</b></p> <p>Earliest possible finalisation of new legislation: <b>end Q4 2020</b></p>	<p>The European Commission has tabled a quick-fix proposal with changes to MiFID. The proposal lowers the burden of some investor protection rules including through more flexibility in costs and charges disclosure and publication of best execution. The proposal includes amendments to the rules on investment research and the unbundling of charges for SME investment research to facilitate greater access to this type of investment research.</p> <p>For Corporates there are important changes to commodity hedging exemption (and position limits) for corporates as well as an alleviation on product governance requirements for plain vanilla corporate bonds to facilitate greater retail investor participation in corporate bond markets.</p> <p>This includes:</p> <ul style="list-style-type: none"> <li>• A hedging exemption from the commodity position regime for non-financial groups where the group includes an investment firm that holds commodity positions that measurably reduce the risks related to the non-financial activity of the group.</li> <li>• A position limits exemption for non-financial and financial counterparties that are under a mandatory liquidity provision obligation.</li> <li>• Exemption for securitised derivatives from the commodity position limits regime.</li> <li>• Reduction of the scope of the commodity position limits regime to agricultural commodity derivatives and derivatives contracts that are considered significant benchmark contracts (open interest of more than 300 000 lots over one year). ESMA will define the captured contracts further in a regulator technical standard).</li> <li>• Simplification of the ancillary activity exemption from the requirement to become an investment firm that market participants can apply for when trading in commodity markets and their trading activity is ancillary to their main business. The proposal removes the quantitative thresholds and maintains only a qualitative threshold. The qualitative threshold sets out that one is eligible for the exemption when one deals on own account or provides investment services to customers or supplies of the main business.</li> <li>• Exemption of corporate bonds from product governance requirements (e.g. the “make whole provisions”) that protect investors from losses in case issuers repay bonds early. This would allow plain vanilla corporate bonds to be marketed to a wider pool of investors without complex product governance rules.</li> </ul>
<b>Prospectus Regulation quick-fix &amp; Review of Regulation</b>	<p>EC proposal on revisions to the Prospectus Regulation: <b>24 July 2020</b></p> <p><a href="#">Ongoing negotiations in the EP on the EC proposal: October 2020</a></p> <p><a href="#">Council finalises position on EC proposal: 21 October 2020</a></p> <p>EC proposal to overhaul entire Prospectus Regulation: <b>Q4 2021</b></p>	<p>The main amendments that are proposed to the Prospectus Regulation are a lower prospectus burden for already listed companies (for a period of 18 months) when tapping markets for further funding. The proposal therefore suggests the creation of a new short form prospectus – “the EU recovery prospectus” – to enable companies to access public markets more efficiently. The simplified prospectus would only be available for share issuance and not for debt issuance.</p>

<b>Market Abuse Regulation Review</b>	<p>EC ask ESMA submit technical advice on MAR review: <b>15 May 2019</b></p> <p><a href="#">ESMA report on review of MAR</a>: <b>24 September 2020</b></p> <p>Review proposal of MAR: <b>2021 (tbc.)</b></p>	<p>On 15 May 2019, the EC formally asked ESMA to submit technical advice ahead of the report the EC is mandated to issue under MAR Level 1. The EC is asking ESMA to go beyond the areas for review laid out in Level 1 in an effort to finetune certain provisions of the MAR framework – notably asking ESMA to look at the inclusion of FX spot markets into the scope.</p> <p>In September 2020, ESMA submitted its final review report to the European Commission, including a number of recommendations for the EC to potentially take forward in a legislative review of MAR:</p> <ul style="list-style-type: none"> <li>• the suitability of setting-up an EU regulatory regime on market abuse for FX spot contracts.</li> <li>• A modification of reporting requirements for buy-back-programmes to reduce and streamline reporting burdens for issuers.</li> <li>• More cooperation between supervisors and tax authorities to prevent dividend arbitrage</li> </ul> <p>ESMA also indicated that it would develop more concrete guidance on where pre-hedging practices could be considered market abuse.</p>
<b>Corporate governance: non-financial reporting (NFRD)</b>	<ul style="list-style-type: none"> <li>• Trilogue agreement on taxonomy regulation scopes in corporates as per the NFRD definition and imposes mandatory disclosure of share of taxonomy compliant activities: <b>December 2019</b></li> <li>• EC to table proposal on the review of NFRD: <b>Q1 2021</b></li> </ul>	The EC is considering expanding the scope of the Directive, as well as the scope and granularity of the information that should be reported. It is also aiming to reinforce the double materiality perspective of the non-financial reporting requirements that obliges companies to report both on the impact of ESG matters on their financial performance, as well as their impact on society and the environment. Additionally, the Commission is looking into the possibility of requiring external assurance of non-financial information, as well as the use of a single set of reporting standards and a digital format.

Unlike the EU proposal, however, the OECD's does not provide for public disclosure of information.</p> <p>On 4 May 2020, the OECD announced a delay in the negotiations on global digital tax and minimum corporate tax rules.</p> <p>The US announced on 17 June a decision to withdraw from the discussions on a global digital tax.</p> <p><b>The OECD published its blueprints for Pillar One (nexus and profit allocation rules) and Pillar Two (global minimum tax rules) which set the technical framework for a political agreement – with mid-2021 now the target for this agreement and which will likely have a knock-on effect for the Commission's Digital taxation agenda.</b></p>
<b>FTT</b>	<p>Next FTT-10 meeting: <b>December 2020 (tbc.)</b></p>	<p>The proposal would exclusively apply to the acquisition in secondary markets of shares of listed companies whose head offices are in the participating Member States and who have a certain market capitalisation (currently the threshold being considered is EUR 1bn).</p> <p>Bonds, derivatives and other non-equity assets would be exempted, unless the underlying is a captured financial instrument. This means that equity derivatives would be included.</p> <p><b>Potential renewed momentum behind the FTT negotiations with Germany taking over the rotating Council presidency for H2 2020 and the FTT being raised as a potential own resource revenue stream for the EU to raise funds to service the debt that the EC will raise on capital markets as part of the EUR 750 Billion Covid-19 Recovery Fund. The European Parliament is pushing for an FTT to be included in the next multi-annual EU budget as a new revenue stream for the EU.</b></p>

		<p>As part of the strategy, the EC will also seek to leverage an open finance approach and create the conditions for increased data sharing between businesses and between supervised entities and regulators through digital solutions. As part of the strategy, the EC already tabled two legislative proposals: one to regulate crypto-assets and the other one to propose a pilot regime for DLT-based market infrastructure.</p> <p><b>LEI adoption</b> The European Systemic Risk board <a href="#">recommends</a> that the European Commission integrate the Legal Entity Identifier more broadly in financial regulation and potentially create an EU-wide regulatory framework for implementation of the LEI.</p>
<p><b>Internationalisation of the euro &amp; creation of a digital euro</b></p>	<p>EC communication: <b>5 Dec 2018</b> The ECB published an initial report on the creation of a digital euro: <b>2 October 2020.</b></p>	<p>The December 2018 EC communication announced a host of public-private collaborative workstreams to explore topics where shorter-term enabling policies could be pursued as such as developing euro area banks role in market-making activity in FX markets. Furthermore, the communication considers the extension of the clearing mandate under EMIR, and for the Commission to stimulate the development of European interest rate benchmarks.</p> <p>In an October 2020 report the ECB raised the prospect of a potential establishment of a digital Euro – a so-called Central Bank Digital Currency (CBDC) – for the Eurosystem. Overall the report highlights that there are a number of scenarios that could force the hand of the ECB to advance creation of a digital euro, but that irrespectively there may be advantages to the ECB creating a digital euro – e.g. keeping in lockstep with a rapidly evolving and digitalising payments landscape in the EU. the report highlights that the ECB views the creation of a digital Euro as being at a very early stage and not a foregone conclusion. Should the ECB go ahead with the project in mid-2021, the first phase would be dedicated to identifying whether a viable digital euro product can be created in a manner consistent with the necessary design features in a cost-efficient manner.</p>

The text highlights the discrepancies between the EU and UK positions, notably on issues such as fisheries, governance and structure of the agreement, social rights and environmental protection.</p> <p>At the end of June, the <a href="#">UK government set out its plan for the future of financial regulation in the UK</a> post-Brexit, signalling a significant degree of divergence across key pieces of prudential and capital markets legislation. This in turn reduces the likelihood of broader equivalence findings by the EU for the UK.</p> <p>The EU-UK negotiations are reaching the final phase. Any agreement between the negotiating parties would need to be concluded in draft form by the end of October 2020 to allow for sufficient time for it to be ratified in the European Parliament, the UK House of Commons, and across the remaining EU Member States.</p>
